IMAN · INNER-CITY MUSLIM ACTION NETWORK

PEACE CORRIDOR™

Street Outreach · Transitional Employment · Hospital Intervention

A holistic approach to ending gun violence in Englewood.

ENGLEWOOD, CHICAGO

IMAN community engagement team on the block, Englewood — green overlay

Peace Corridor provides street-level violence interruption, transitional employment, cognitive behavioral therapy, and hospital-based crisis intervention for **highest-risk individuals and justice-involved youth**, as a holistic approach to **ending gun violence, preventing premature death, and restoring safety to Englewood's streets**.

IMANPEACE CORRIDOR™

THREE CORE PROGRAM TRACKS

STREET OUTREACH & INTERRUPTION

Credible messengers embedded in Englewood's highest-shooting blocks detect conflicts before escalation, mediate disputes, and connect highest-risk individuals to services. Built on the Cure Violence model — proven to reduce shootings by 30–60%.

FULL-TIME · COMMUNITY-EMBEDDED

CBT + TRANSITIONAL EMPLOYMENT

18-month program combining cognitive behavioral therapy with paid transitional jobs, modeled after READI Chicago — shown to reduce violent crime involvement by 79% among highest-risk men. Direct pipeline into IMAN's Green ReEntry trades training.

18 MONTHS · WEEKDAYS

HOSPITAL-BASED INTERVENTION

Violence intervention specialists embedded in the trauma bay reach shooting victims at the moment of highest motivation for change — before discharge, before retaliation. A 30-minute conversation at that moment saves lives.

24/7 · ON-CALL

WRAPAROUND SUPPORT SERVICES

LEGAL SERVICES

Expungement, record sealing, and civil legal aid — removing the criminal record barriers that block housing, employment, and stability. Partnerships with clinics across family, housing, and civil rights law.

WORKFORCE PLACEMENT

Direct pipeline into IMAN's Green ReEntry trades program. Graduates earn NCCER-accredited certifications in carpentry, welding, HVAC, and emerging trades including EV technology, with living-wage job placement assistance.

ALUMNI LEADERSHIP

Program graduates become paid Peace Corridor outreach workers and community safety ambassadors — turning lived experience into professional credibility, and cycles into careers.

NO HANDOFFS. ONE TEAM.

Every participant moves through a single integrated pathway — from first contact on the block or in a trauma bay, to stable employment, housing, and legal standing.

"EVERYONE IN ENGLEWOOD WANTS TO LIVE. NOT EVERYONE HAS BEEN GIVEN A REASON TO BELIEVE THEY WILL."

If individuals at the highest risk of being shot or incarcerated are reached by credible messengers, provided with economic alternatives through **transitional employment and CBT**, and connected to healthcare, housing, and legal support — then they will be on a thriving pathway to **financial, physical, social-emotional, and spiritual growth** that will impact themselves, their families, and their community.

The evidence is not theoretical. It is documented.
What Englewood has been missing is not proof — it is investment.

HOLISTIC APPROACH

CRISIS-TO-STABILITY CONTINUUM FOR EVERY PARTICIPANT

From the moment of contact — whether on the block or in a trauma bay — every Peace Corridor participant is enrolled in a structured pathway: outreach → CBT → employment → housing → healthcare → legal. **No handoffs. One team.**

WEEKLY THERAPY, FINANCIAL LITERACY & BEHAVIORAL HEALTH

Every participant receives 1 hour of individual therapy and 1 hour of life coaching per week, plus weekly group sessions in financial literacy, trauma recovery, and spiritual grounding — gaining more than a job, gaining a foundation.

FULL INTEGRATION WITH IMAN'S HEALTH CENTER, GREEN REENTRY & GRIOT PLAZA

Peace Corridor participants are enrolled in IMAN's FQHC for primary and behavioral healthcare, connected to Green ReEntry's workforce pipeline, housed in transitional units, and anchored at Griot Plaza. This is the full IMAN ecosystem — activated for Englewood's most vulnerable.

BACKED BY THE STRONGEST EVIDENCE IN PUBLIC HEALTH.

THE MOST RIGOROUSLY TESTED VIOLENCE INTERVENTION MODELS IN THE U.S. — APPLIED IN ENGLEWOOD.

STREET OUTREACH — CURE VIOLENCE

30–60% reduction in shootings · 56% homicide drop in Baltimore

Ransford et al., systematic review; Johns Hopkins evaluation

CBT + EMPLOYMENT — READI CHICAGO

79% reduction in violent crime involvement

University of Chicago Crime Lab, 2023

HOSPITAL-BASED INTERVENTION

3–5× more likely to engage when reached in trauma bay

National Network of Hospital-Based Violence Intervention Programs

IMAN participant in skills training or CBT counseling session

STREET OUTREACH & INTERRUPTION

- **Cure Violence model proven in 30+ US cities** — average 30–60% reduction in shootings when implemented with fidelity; 56% homicide reduction in Baltimore's highest-violence district
- **Outreach workers are credible messengers** — formerly justice-involved individuals from the same blocks, trained in conflict mediation, CBT techniques, and case management; the only messengers high-risk individuals trust
- **Real-time intelligence layer** — outreach workers in Englewood's highest-shooting corridors detect brewing conflicts before police or hospitals see them, coordinating with IMAN's existing community safety team

YEAR 1 PROJECTION

6–10 full-time outreach workers covering Englewood's highest-risk corridors · Estimated 30–50% reduction in shootings in target area within 24 months

CBT + TRANSITIONAL EMPLOYMENT

- **79% reduction in violent crime involvement** among READI Chicago participants — highest-risk men who received 18 months of transitional employment + CBT vs. control group *(UChicago Crime Lab, 2023)*
- **Direct pipeline into Green ReEntry** — participants earn NCCER-accredited certifications in carpentry, welding, HVAC, and EV technology with living-wage job placement assistance
- **91% retention rate in 2024** across 350 Green ReEntry participants — proving IMAN's workforce model holds even for the highest-risk populations

SUCCESS STORY

One Green ReEntry graduate is now a certified instructor at City Colleges of Chicago — teaching the next cohort the same skills that changed his life.

LEGAL SERVICES

- **Criminal records are the wall between graduates and stability** — expungement and record sealing remove the single biggest structural barrier to housing, employment, and financial access
- **Partnerships with legal clinics and firms** across family law, housing law, driving records, and civil rights — the same infrastructure IMAN uses in Green ReEntry, now extended to Peace Corridor
- **Know Your Rights workshops** — every participant understands their rights in police encounters, housing disputes, and employment — because knowledge is the first form of protection

Green ReEntry has secured expungements for 20+ participants and hosted Know Your Rights workshops for nearly 50. Peace Corridor extends this to 50+ participants annually in Year 1.

IMAN participants at the Illinois State Capitol — advocacy and civic engagement

A FOCUS ON HEALING

As part of IMAN's holistic model, all Peace Corridor participants receive regular primary and behavioral health care and support through IMAN's Federally Qualified Health Center:

- **IMAN's Behavioral Health team has seen over 2,000 patients from Green ReEntry** — the same integrated care infrastructure, already proven, now extended to Peace Corridor's highest-risk population
- **Specialized trauma recovery groups** — trauma recovery, grief counseling, parenting skills, and spiritual care — offered in community, not in a clinic

Gun violence is not only a public safety crisis. It is a public health crisis.
Peace Corridor treats it as both.

YEAR 1–2
PROJECTED HIGHLIGHTS

50–75 **highest-risk individuals** enrolled in CBT + transitional employment in Year 1, drawn from Englewood's documented highest-risk population *(projected)*

200+ **conflict mediations** conducted by street outreach team in Year 1 — each one a potential life saved before it becomes a shooting statistic *(projected)*

30–50% **projected reduction in shootings** in target corridors within 24 months — consistent with Cure Violence outcomes in comparable cities *(projected; UChicago Crime Lab benchmarks)*

BUILDING THE FUTURE

PROGRAM SCALE

Grow to 100-person cohorts

Double the CBT + employment cohort as the Regenerator opens — providing on-site housing, pharmacy, and FQHC for the program's highest-need participants

Expand to Chicago Lawn

Extend street outreach and hospital-based intervention to IMAN's second primary service neighborhood, building a South Side-wide safety infrastructure

WORKFORCE INTEGRATION

Culinary, Automotive & EV Trades

As Green ReEntry expands into three new trades tracks, Peace Corridor graduates gain additional pathways including the growing EV infrastructure sector

Formalize the Alumni Pipeline

Structured career track: participant → graduate → paid outreach worker → program staff — turning lived experience into a profession

HOSPITAL PARTNERSHIPS

2–3 South Side Trauma Centers

Expand hospital-based intervention to reach shooting victims at every major South Side trauma bay — including U of C Medical Center and Advocate Christ Medical Center

Peace Corridor builds on IMAN's nationally recognized track record — bringing the same credibility, the same infrastructure, and the same trust to Englewood's most urgent unmet need.

ABOUT IMAN:

FOSTERING HEALTH, WELLNESS, AND HEALING

The **Inner-City Muslim Action Network** (IMAN) is a community organization that fosters health, wellness, and healing in the inner city by organizing for social change, cultivating the arts, and operating a holistic health center.

IMAN incorporated as a nonprofit in 1997 through the drive of people directly affected by and deeply invested in social issues affecting communities of color living on Chicago's South Side. Since that time, IMAN has steadily grown and, in 2016, opened a second office in Atlanta to continue mobilizing a cross-section of people committed to this mission.

The organization models an integrative approach that employs holistic interventions to address a spectrum of structural and systemic injustices — incorporating primary and behavioral health; artistic expression; leadership development; organizing and advocacy; housing; and job training — in an effort to substantially increase the quality of life for people in marginalized communities.
